### NOTICE TO RESIDENTS

#### 2011 Water Main Flushing Program

The Public Works Department began a water main flushing program on **Sunday, October 23, 2011 at 8:00 p.m.** Flushing is required to remove the rust and sediment that has accumulated in the water mains. City crews will be flushing the mains from approximately **8:00 p.m. through to 6:00 a.m. until completed.** Flushing began on the **West Side of the City** on the first evening and will move towards the **East Side of the City** thereafter.

During flushing, the water will contain a considerable amount of rust and sediment, and may be discolored for several hours. The system pressure will fluctuate during the flushing period. Both the sediment and the low pressure can cause problems in the operation of plumbing fixtures, especially air conditioning, refrigeration equipment, and water softeners. Doing laundry is not recommended, as the discolored water will stain clothing. For this reason, it is advisable not to use water if it is discolored unless it is absolutely necessary to do so.

**Residents who live in the areas being flushed should collect containers of water beforehand for drinking and cooking, before the flushing program starts.** Residents should use as little water as possible, and should avoid drawing water into their homes. It's best not to use your washing machine or dishwasher until the water color returns to normal.

If further information is required, please contact the Public Works Department at 786-1760 between 7:00 a.m. and 4:00 p.m., Monday through Friday.

#### Temporary Road Closure

Please be advised that Dracup Avenue between Smith Street and Darlington Street will be closed to traffic from October 31, 2011 to November 21, 2011. The City thanks motorists for their patience during this closure. Please obey all traffic signage in the construction zone.

#### Private Well Construction and Discharge of Water from Wells

The City of Yorkton would like to inform and remind its residents that bylaws are in place that prohibits the construction of private wells within the City of Yorkton. In addition, the discharge of any well water into any sewer within or entering the City without a permit is also prohibited.

**A well can be defined as any underground structure that is dug or drilled into the ground in order to obtain, store or divert water. These structures could present potential issues for drainage to adjacent neighboring properties. They can also be a safety hazard if not properly capped and locked, as well as being a source of contamination of ground water sources.**

**Bylaw 18/2006, Section 3.27 – Private Wells**

3.27 No person shall use any alternate source of water supply other than the City water system without first obtaining the written consent of the City. Private Wells within the City are not permitted.
